

EDUCATION

- **Georgia Institute of Technology** Atlanta, GA
M.S. in Computer Science; Artificial Intelligence specialization; GPA: 4.0 Expected: Dec 2028
- **Biola University** La Mirada, CA
B.S. in Computer Science; Data Science concentration May 2024

EXPERIENCE

- **Georgia Institute of Technology** Remote
Graduate Student Researcher May 2026 - Present
 - **MCP Security:** Conducted research on Model Context Protocol (MCP) tool security for LLM-agents for paper submission to ACM/IEEE journals under guidance from Dr. Vijay Madisetti.
- **Five More Talents** Remote
Software Engineer Jun 2025 - May 2026
 - **AI Workflow Automation:** Built AI automated workflows using Python, JavaScript, n8n, and OpenAI API, reducing client publishing time by 90% through automated scraping, transcription, and post generation.
 - **Product Engineering:** Led the company's AI initiative by translating client publishing workflows into automated systems, partnering directly with the CEO to define requirements, scope MVPs, and ship client-facing solutions.
 - **Technical Documentation:** Authored internal documentation and deployment guides for non-technical users, reducing workflow setup time to minutes without engineering support.
 - **Frontend Redesign:** Led the full visual redesign of sermonpress.ai using HTML/CSS on WordPress, improving UX and accessibility for users.
 - **Data Migration:** Migrated 900+ media files and client assets, ensuring 100% data integrity and zero data loss.
- **Gatherly** Remote
Cofounder Aug 2025 - Jan 2026
 - **Full-Stack Development:** Engineered a church communication platform serving 3 churches nationwide and 2000+ monthly visitors via SEO optimization and product feature on faith.tools.
 - **Sales Engineering:** Drove 66% of closed deals to date by leading client discovery calls, delivering tailored live product demos, and providing hands-on technical onboarding and implementation support.

PROJECTS

- **CampaignOS** TypeScript, React, Elysia, LangGraph
 - **Hackathon Winner:** Developed a UGC campaign intelligence agent in 9 hours, winning the Reacher track at the Nozomio hackathon out of 200+ hackers.
 - **Agentic Framework:** Architected an evaluation framework that converted campaign goals into weighted KPIs to score TikTok Shop creators, bucket performance tiers, and generate outreach drafts.
- **MarketShift** Python, FastAPI, TypeScript, React, LangChain
 - **Hackathon Top 4:** Built a multi-agent competitive intelligence platform in 5 hours, placing 4th among 30+ teams by automating market research and competitor discovery.
 - **Latency Optimization:** Reduced end-to-end agent latency by 85% by benchmarking models on GMI Cloud and optimizing prompts to minimize token overhead while preserving signal quality.
- **Recurve AI** Python, FastAPI, JavaScript, React
 - **Agentic Sales Pipeline:** Engineered a multi-agent sales pipeline in under 7 hours to generate hyper-targeted sales strategies and identify high-intent leads, drastically reducing manual SDR prospecting.

SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL, HTML, CSS
- **AI/ML:** LangChain, LangGraph, LLM Agents, Prompt Engineering, RAG, MCP, NumPy, Pandas
- **Frameworks & Libraries:** FastAPI, React, Next.js, Node.js, Express, Tailwind CSS, Prisma, Shadcn, Pydantic
- **Tools:** GitHub, Docker, Cloudflare, Supabase, PostgreSQL, NeonDB, AWS, n8n, Vercel, PostHog, Cursor, Claude Code
